Caldera
Direct Vent Fireplace

Caldera

Efficiency Has Never Looked So Good

- State-Of-The-Art Electronic Ignition
- 35,000 Btu Input Natural Or Propane Gas
- Efficiency As High As 72.2%
- Wireless Remote Thermostat With Variable Flame Height Control
- Intermittent Or Standing Pilot For Improved Efficiency
- Pyro-Glo® Ceramic Burner & Logs
- Oversized 750+ Sq. in. Glass Front
- Easy To Clean Removable Glass Door
- 1400 Degree Ceramic Glass
- Limited-Lifetime Warranty Includes 5 Years Parts & Labor On Fans And Controls
- Vanity Light For Year-Round Illumination Of The Fireplace (With Optional Front Only)
- Interchangeable Fronts To Customize Appearance (optional)
- Top Vent or Rear Vent Convertible

Embellish your new Caldera fireplace with old-world charm by adding the stunning Windsor Arch front. The Windsor Arch front features a halogen light to illuminate the beauty of the fireplace year round. Yes, you can even open the front doors to have an unobstructed view of the fire.

The Anatomy of a Great Zero-Clearance Fireplace!

Snap Disc

The temperature sensing snap disc automatically turn your fans on and off when your Blaze King® is being used.

Fan Assembly

This is a fan assembly. There are many types used, but all essentially do the same thing, help to move hot air around your home. Blaze King® gas appliance fans are covered for a full five years, parts & labor!

Gas Valve

This is a high-tech electronic ignition gas control valve. It regulates gas flow to your appliance and has many features, including the choice of either intermittent or standing pilot. By selecting the intermittent option, your Caldera

Fireplace can provide exceptional efficiencies by allowing the pilot to only burn while the main burner is operating. When you purchase a Blaze King® gas appliance, the valve & labor are both covered for a full 5 years.

Wireless Remote

This is a wireless remote thermostat. With this handy device you can regulate flame height and control heat output. You can also control fan speed and turn the illuminated halogen viewing lamp on and off (with optional front). An easy to read, illuminated digital display makes it easy to dial in your comfort zone.

The superior design and engineering embodied in the Caldera produces a supremely clean burning and attractive gas fireplace. It is suited to even the most difficult installations, including high altitude applications. With a simple installation of approved venting, you can safely burn either liquid propane or natural gas. Refer to Owners & Operators Manual Prior To Installation. This appliance must be properly connected to a venting system in accordance with manufacturer's installation instructions.

The Caldera Ember Guard Screen conveniently snaps into place in the door of the Caldera fireplace. The screen provides a diffused appearance of the fire and can easily be removed to enjoy a full view of the fire.

Remember back to the days of your childhood? Nearly every fireplace had the charm of the hanging screen, well you can now share that memory of the fireplace with your family and friends.
